PROFESSIONAL SUMMARY

Experienced Tooling Engineering professional with more than 10 years of experience in footwear manufacturing industry, specializing in CAD 2D/3D development, tooling engineering, gauge design, mold modification, and production support. Skilled in Rhinoceros, Cadkey, and tooling development processes for new model projects and production improvement.

Strong understanding of tooling systems, dimensional control, mold verification, and manufacturing processes. Experienced in cross-functional coordination, vendor collaboration, and continuous improvement initiatives to support production efficiency and product quality.

Seeking to contribute technical expertise and leadership capability as Assistant Manager Tooling Engineering.

CORE COMPETENCIES

Tooling Engineering	CAD 2D & 3D Design
Mold Modification	Gauge Development
Bottom CAD Engineering	Production Support
New Model Development	Manufacturing Problem Solving
Vendor Coordination	Team Coordination
Microsoft Office	Rhinoceros & Cadkey

PROFESSIONAL EXPERIENCE

PT Pratama Abadi Industri Tooling Engineer – Bottom CAD 2D & 3D

- Develop and modify 2D & 3D tooling design for new model development and production support.
- Create and optimize tooling systems including bottom tooling, gauge, and universal tooling.
- Support production activities by troubleshooting tooling-related issues and implementing corrective actions.
- Coordinate with production, development, and vendor teams to ensure tooling readiness and dimensional accuracy.
- Perform mold verification and dimensional checking to maintain product quality standards.
- Support continuous improvement activities for tooling efficiency and manufacturing performance.
- Create technical feedback and suggestions for tooling and product development improvement.

Achievements:

- Improved tooling accuracy and reduced production rework through optimized CAD modification process.
- Contributed to faster tooling preparation for new model development projects.
- Supported production efficiency improvement through tooling optimization initiatives.

PT Pratama Abadi Industri Daily Mold Checker

- Conduct dimensional checking and mold inspection to ensure compliance with production specifications.
- Monitor tooling condition and coordinate corrective action for tooling abnormalities.
- Support production quality assurance related to mold and tooling systems.

PT Pratama Abadi Industri
Production Operator

- Support footwear production process according to quality and safety standards.
- Operate production equipment and maintain process consistency.

EDUCATION

[Isi Pendidikan Terakhir Anda]

TECHNICAL SKILLS

Software:

- Rhinoceros
- Cadkey
- Adobe Illustrator / Acrobat
- Microsoft Excel
- Microsoft Word
- Microsoft PowerPoint

Engineering Skills:

- 2D & 3D CAD Design
- Tooling Development
- Gauge Design
- Mold Engineering
- Technical Drawing Reading
- Dimension Analysis
- Manufacturing Process Support

LANGUAGE

- Bahasa Indonesia – Native
- English – Intermediate (technical communication & drawing interpretation)
